

# ELEMENTARY TEACHER EDUCATION, ASSOCIATE IN ARTS FOR TRANSFER (AA-T)

Liberal Studies at Santa Barbara City College is an interdisciplinary program that provides students with a foundation of knowledge in the areas of English composition, critical thinking, oral communication, physical and life sciences, arts and humanities, and social sciences. Through this program, students acquire a breadth of knowledge across multiple disciplines, explore how knowledge across disciplines can be connected, analyze and evaluate ideas using the tools of critical thinking, and demonstrate effective communication skills in reading, writing, listening and speaking.

The Associate in Science for Transfer degree in Elementary Teacher Education provides students with the foundational knowledge necessary to make a successful transition into a Baccalaureate Degree at any of the CSU campuses. The Associate Degree for Transfer (AA-T or AS-T) is a special degree offered at California Community Colleges. Students who earn an AA-T or AS-T degree are guaranteed admission to a campus within the California State University (CSU) system in a similar major, although not necessarily to a specific campus. Students who complete an AA-T or AS-T are given priority consideration when applying to a particular program that is similar to the student's community college major and will be given a special GPA advantage when applying to CSU impacted campuses or majors. Students who are planning to pursue an AA-T or AS-T are strongly advised to meet with a counselor for additional information about this transfer program. Visit <https://adegreewithaguarantee.com/> for more information about these degrees.

Students are advised to meet with an academic counselor to discuss the best combination of courses to take for the AA-T and to meet the

requirements of the transfer institution to which they are intending to transfer.

## Learning Outcomes

1. Develop an awareness of the study of cultural, literary, humanistic activities and artistic expression of human beings.
2. Evaluate and interpret the ways in which humans through the ages in different cultures have responded to themselves and the world around them in artistic and cultural creation.
3. Use the scientific method to develop and test a hypothesis.
4. Use mathematics to predict and model scientific phenomena.
5. Evaluate human behavior and human interaction in the social and physical environment.
6. Survey, analyze and interpret concepts, theories and methodologies to cultivate an understanding of human beings and the societies and cultures they create.
7. Identify and evaluate how societies and social subgroups operate.
