

VMWARE VSPHERE INSTALL, CONFIGURE, MANAGE, CERTIFICATE OF COMPLETION

Requirements

The certificate of completion in VMware vSphere Install, Configure, Manage provides students with the skills and competencies to install, configure and manage vSphere systems.

This certificate is a gateway into credit programs, helping students prepare for a more complete set of courses and programs in the system administration area.

Code	Title	Units
CISV NC005	VMware vSphere Install and Configure	0
CISV NC006	VMware vSphere Advanced Management	0

Learning Outcomes

1. Explain the steps required to install VMware vSphere and create virtual machines.
2. Describe the appropriate configurations for vSphere implementations.
3. Demonstrate the ability to configure advanced VMware vSphere features, such as high availability.
