## VMWARE VSPHERE INSTALL, CONFIGURE, MANAGE, CERTIFICATE OF COMPLETION

## **Requirements**

The certificate of completion in VMware vSphere Install, Configure, Manage provides students with the skills and competencies to install, configure and manage vSphere systems.

This certificate is a gateway into credit programs, helping students prepare for a more complete set of courses and programs in the system administration area.

| Code       | Title                                | Units |
|------------|--------------------------------------|-------|
| CISV NC005 | VMware vSphere Install and Configure | 0     |
| CISV NC006 | VMware vSphere Advanced              | 0     |
|            | Management                           |       |

## **Learning Outcomes**

- 1. Explain the steps required to install VMware vSphere and create virtual machines.
- 2. Describe the appropriate configurations for vSphere implementations.
- 3. Demonstrate the ability to configure advanced VMware vSphere features, such as high availability.
